

About Me

I am a Games Programming graduate eager to kickstart my professional journey in the video game industry.

My deep-rooted passion for video games, combined with an insatiable curiosity to explore every corner of game development, fuels my aspiration to contribute to a high-achieving team that upholds unwavering quality standards.

Throughout my academic journey, I have not only mastered the technical intricacies of computer science but also cultivated a knack for seamless collaboration across diverse teams.

Drawing from my experience leading multicultural teams in the hospitality sector, I am poised to foster an environment where creativity flourishes and every team member thrives.

My projects can be reviewed at <https://www.danielbellido.com/>

Extracurricular

- **Retro Gaming Enthusiast:** A passionate collector of vintage video games and gaming consoles, reflecting a deep appreciation for gaming history.
- **Linguistic Pursuits:** Engaging in the study of Japanese and Chinese languages for personal enrichment and cross-cultural exploration.

Daniel Bellido Chueco

GAME PROGRAMMER
& DESIGNER

Education

- 2020-2023
Kingston University London
First Class in Computer Games Programming BSc
- 2019-2020
Kingston University London
Computer Games Programming Foundation course
- 2010-2012
I.E.S Manuel de Cabanyes
Spanish Baccalaureate Degree Vilanova i la Geltrú (Barcelona)

Work Experience

- 2017 – 2022
Pret A Manger | Kitchen Team Leader
 - Responsible for meticulously planning and orchestrating daily production operations, ensuring strict adherence to the company's stringent health and safety protocols in pursuit of weekly production targets.
 - Overseeing critical tasks, committed to motivating and assisting team members
 - Addressing customer inquiries with a steadfast commitment to delivering exceptional customer service.
- 2015 – 2017
McDonald's | Crew Trainer
 - Training and mentoring kitchen staff to meet company standards.
 - Excelling at efficient product preparation and serving across multiple shifts.
 - My customer service experience extends to both direct interactions and meticulous warehouse inventory management.

Skills

● **Programming Languages:**

Proficient in a diverse range of programming languages, such as C++, C#, and GLSL, with a proven ability to develop efficient solutions for game development and computer graphics projects.

● **Game Design:** Strong grasp of game design principles from pre-production to launch, including GDD creation, mechanics, dynamics, aesthetics, narrative, monetization, agile development planning, collaborative tools, prototyping, testing, and game launch.

● **Unity:** Proficient knowledge of the game engine as well as the C# language to develop scripts. Developing a project at an individual level, and achieving one of the highest marks.

● **Unreal Engine:** Proficient in blueprint scripting, C++ plug-in development, and adept at debugging within the engine.

● **3D Maths:** Solid understanding of mathematical principles and techniques to solve problems related to three-dimensional space. Experienced in vector algebra, matrix operations, geometric transformations, and calculations involving points, lines, curves, surfaces, and volumes in 3D environments.

● **Autodesk Maya:** Exceptional use of software for modelling, texturing, lighting, animating, and rendering scenes as an image and professional-looking assets in 3D computer graphics.

● **Additional tools:** Proficient in Photoshop for creating UV layouts and various design tasks. Skilled in Adobe Premiere, Substance Painter, and Microsoft Office suite. Well-versed in collaborative tools such as Git, and Trello, using agile work methodologies.

● **English:** Proficiency in written and spoken English at an academic level where multiple reports and presentations have been made, being awarded with a First Class with Honours.
